EXAMINER'S COMMENT AND STATEMENT OF REASONS FOR ALLOWANCE

New corrected drawings in compliance with 37 CFR 1.121(d) is required. See Draftperson's Drawing Review attached to the Office Action mailed on June 24, 2003.

Applicants' arguments with respect to the rejections under 35 USC 112 paragraph 1 made in the office action mailed on October 20, 2004 are persuasive. Accordingly, the Examiner is withdrawing this rejection.

The following is an examiner's statement of reasons for allowance.

None of the prior art either alone or in combination discloses or teaches the method steps of manufacturing a patient-specific implant including: 1) obtaining medical two-dimensional image data of a defect area in a patient requiring an implant and an environment thereof for a patient; (2) using a mathematical image processing algorithm to form a surface using the two-dimensional data; (3) performing a segmentation to detect bones and hard tissue ranges; (4) generating a virtual three-dimensional model from the image data of the defect area and the environment thereof; (5) comparing the virtual three-dimensional model to real medical reference data; (6) selecting a plurality of sets of the reference data and forming a corresponding plurality of three-dimensional reference model objects therefrom most resembling the patient; (7) selecting one of the plurality of three-dimensional reference model objects best suited for the patient; (8) generating a virtual implant model from the selected three-dimensional reference model object by superimposing the selected three-dimensional reference model object with the virtual three-dimensional model; and (9) manufacturing the implant by computer numeric control based on data from the virtual implant model.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Anu Ramana whose telephone number is (571) 272-
